

## 03 Additional Resources - Translation on iPads

### Translation on iPads

When you come across something you want to translate on an iPad it is not always easy. Let's look into the various different ways you can manage translations on the iPad.

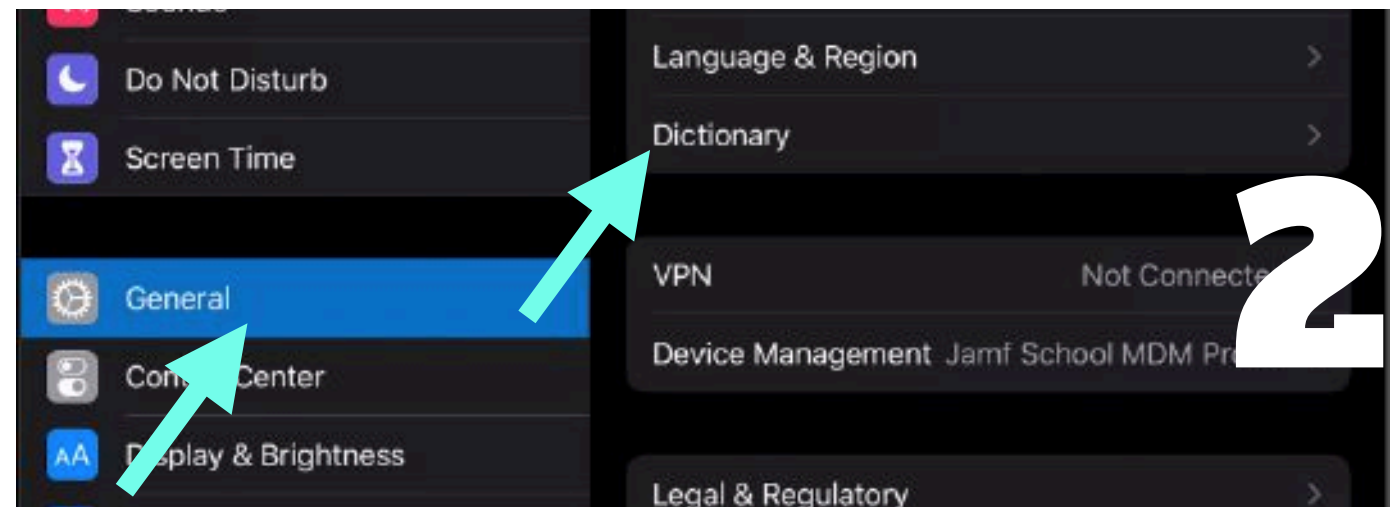

1

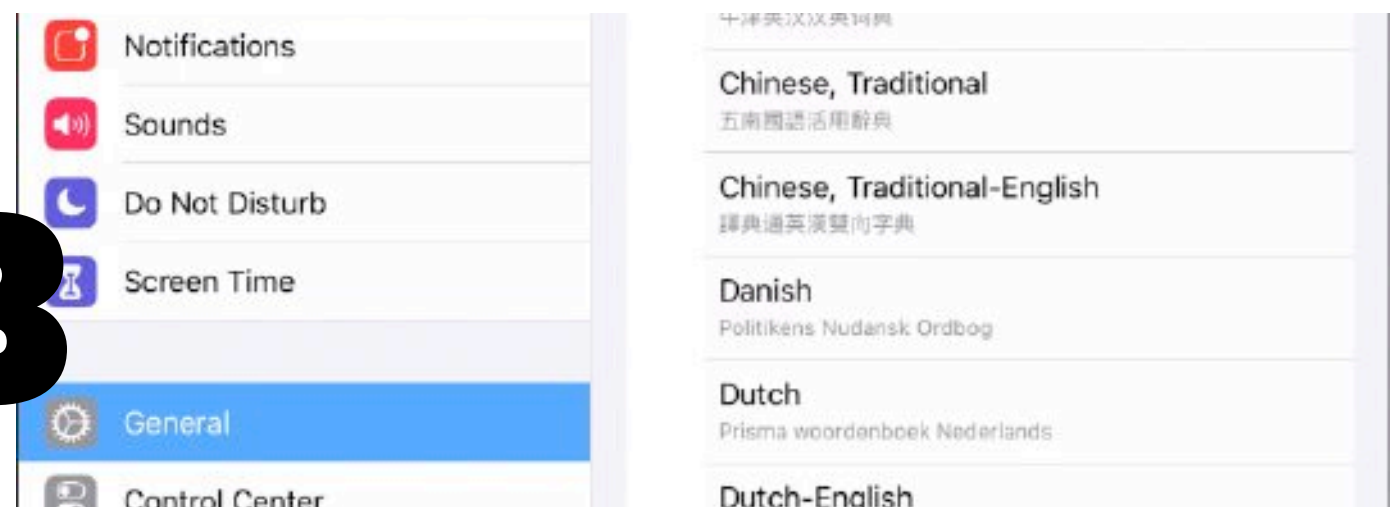

To begin, every iPad has a built in dictionary and you can select which language(s) you want to have available, even offline.

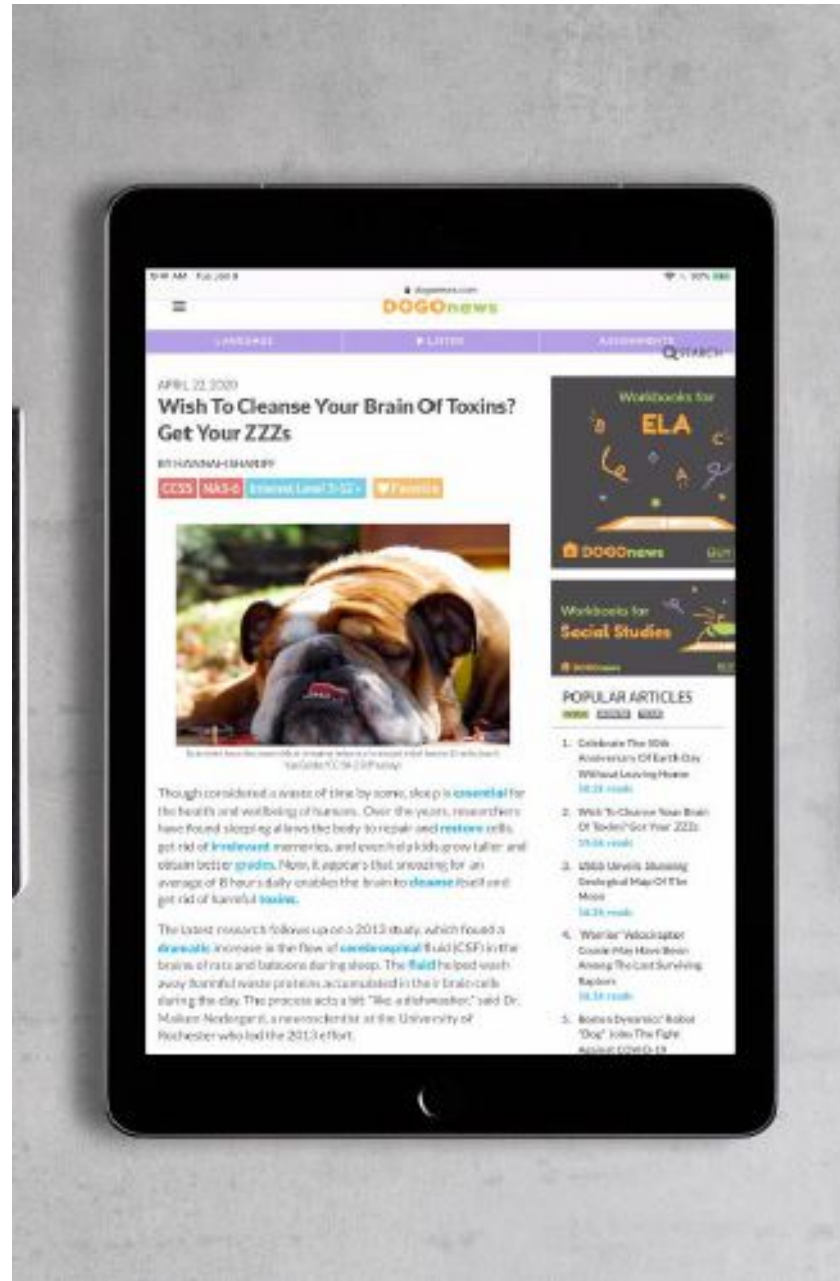

1. Tap on Settings
2. Tap General on the left, then Dictionary on the right
3. Select the languages you want to have available on the iPad

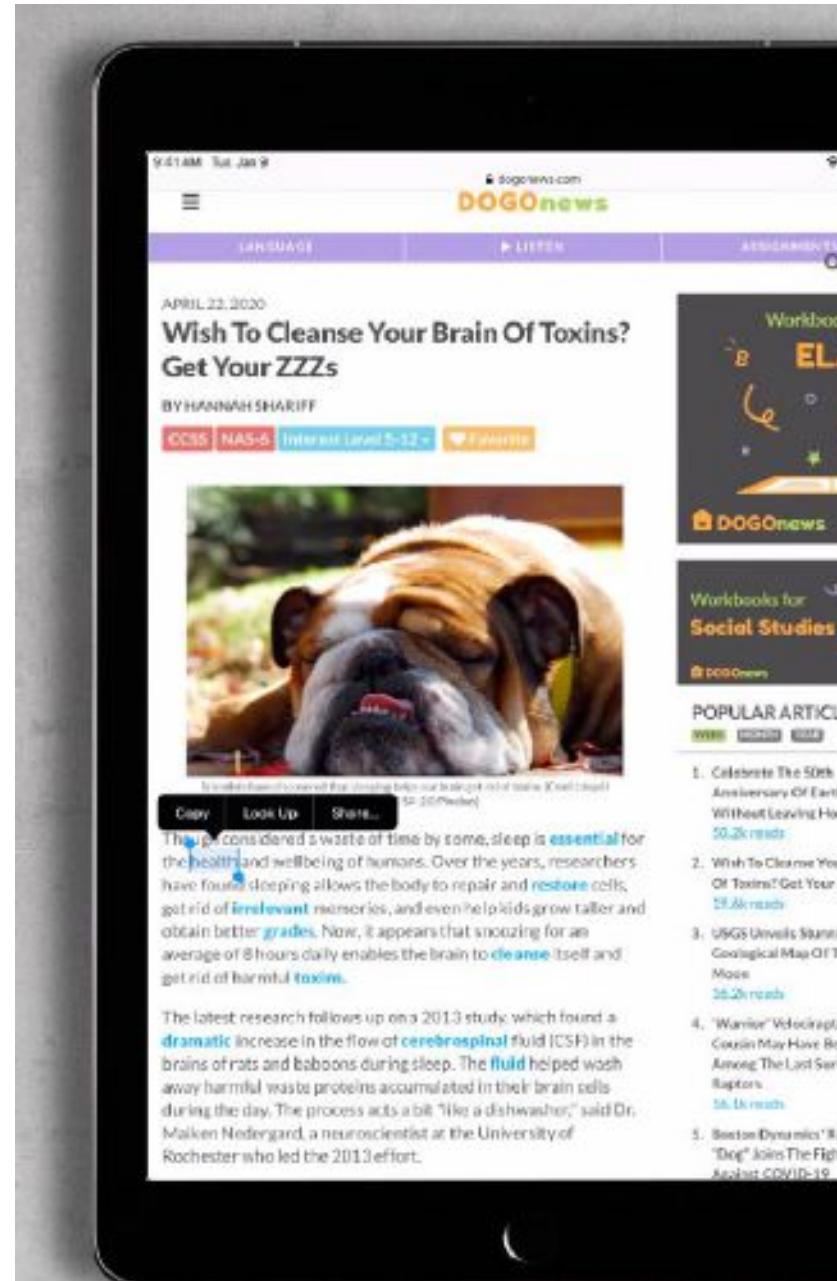

3

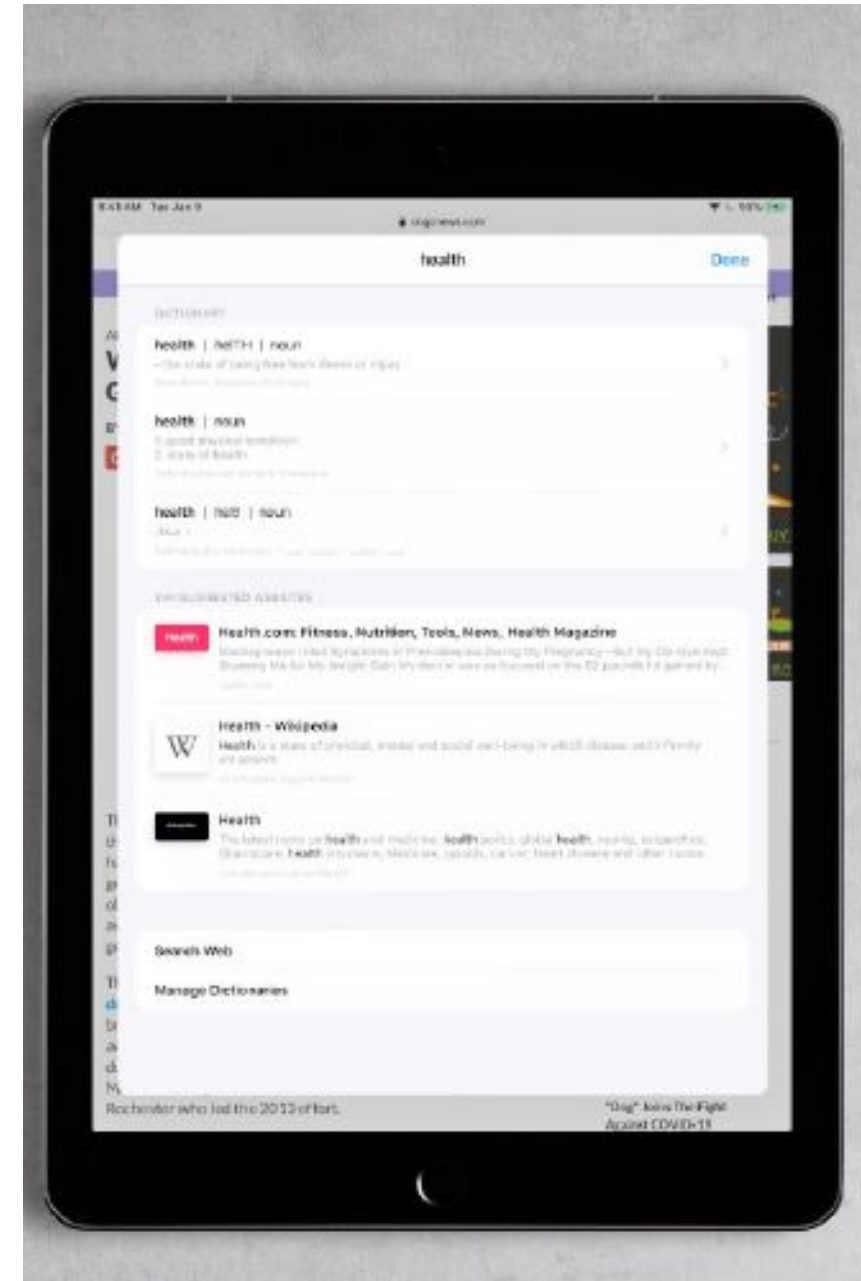

## 03 Additional Resources - Translation on iPads

Tap and hold to select the word you want to translate. The built in dictionary only works with single words.

Tap and hold to select the word you want to translate. The built in dictionary only works with single words. Then tap Look Up.

The built in dictionary will appear and translate the word into all of the languages that you selected in the dictionary settings page.

### More ways to translate...

Additionally, iPads can also use apps like Google Translate and Microsoft Translator to help translate phrases and websites. Let's take a look!

Google Translate is already installed on your iPad. You can use the built in options from the iPad and Google Translate to translate phrases on the iPad. Here are two videos that walk through a couple of different ways for translating. If you cannot view the videos, the guides are also on the following pages.

1. Using side by side apps
2. Using extended options

### Using side by side apps

To begin, the Google Translate app needs to be moved to the dock. 1. Tap and hold the button until the icons start to jiggle and then 2. tap and drag the icon to the dock.

Open another app where you have something that needs to be translated, like a webpage. Then carefully take your finger from the bottom of the screen and drag it up until the dock appears.

Now tap and drag the Google Translate icon to the right side of the screen. The layout will shift and then you can drop it into place. Now it will be side by side with the first app.

### Using extended options

To begin, the Google Translate app needs to be moved to the dock. 1. Tap and hold the button until the icons start to jiggle and then 2. tap and drag the icon to the dock.

Open another app where you have something that needs to be translated, like a webpage. Then select text and choose copy.

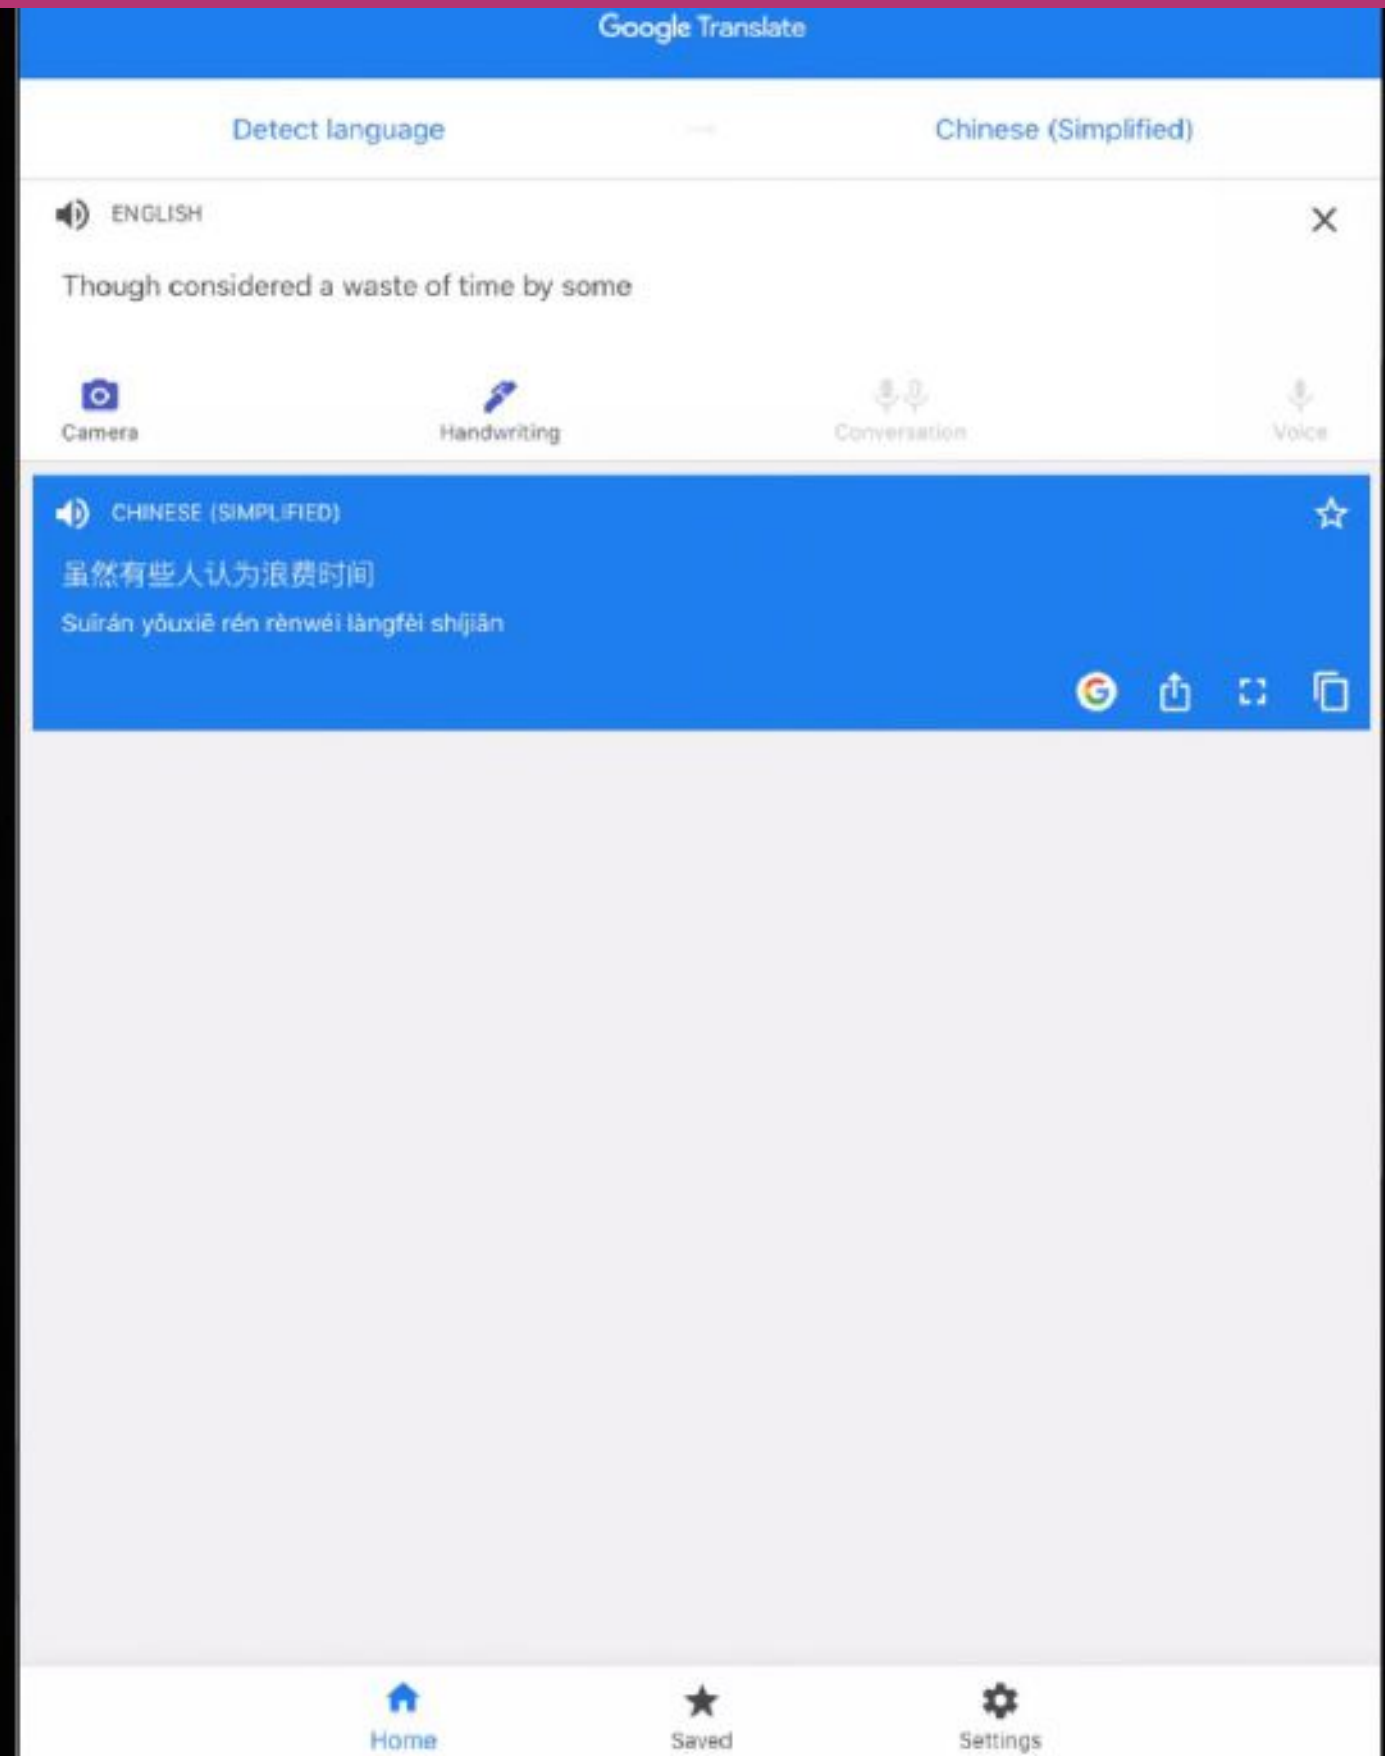

Then carefully take your finger from the bottom of the screen and drag it up until the dock appears. After that tap and hold on the icon until an extended menu appears. Tap Paste and translate.

## 03 Additional Resources - Translation on iPads

It will automatically take the copied text, put it into Google Translate, open the app, and translate it for you.

To see a list of all of your previous translations tap the Home icon in the bottom row.

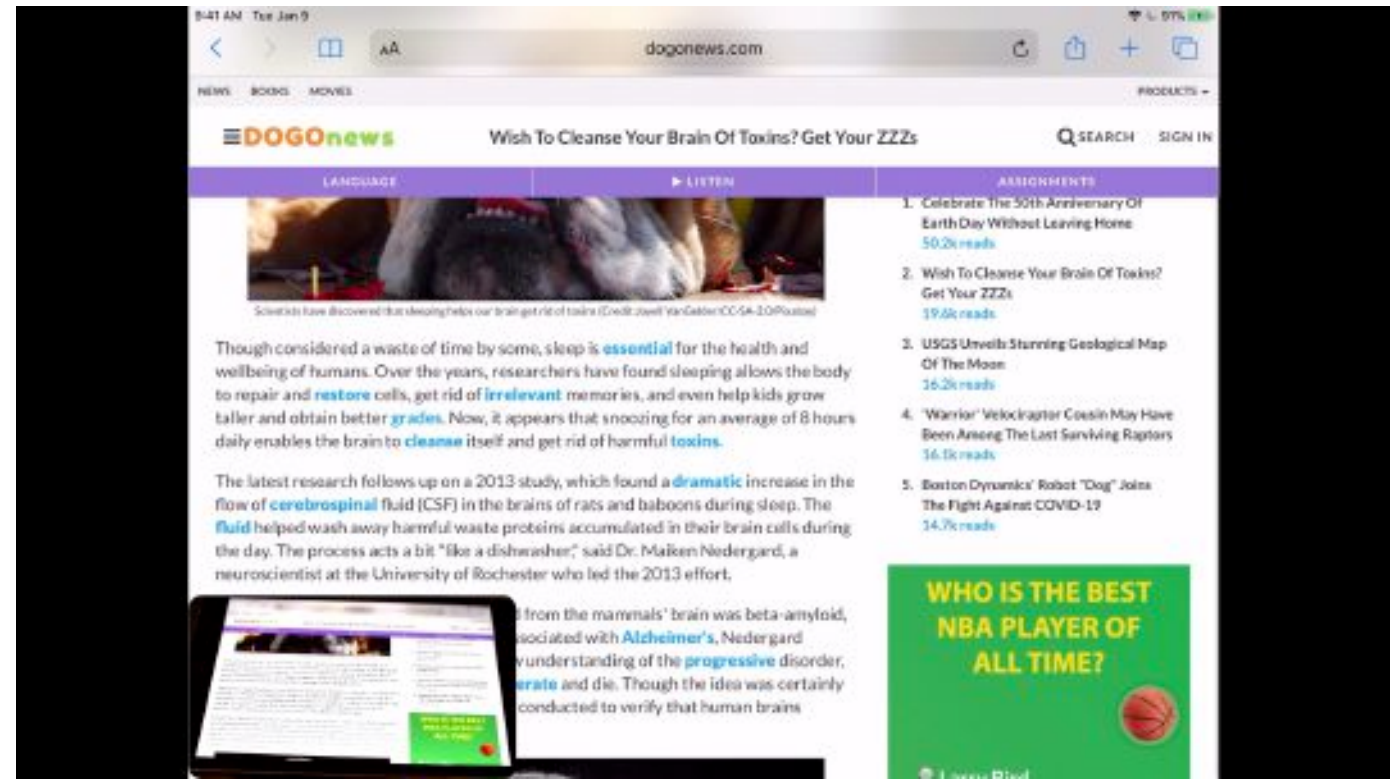

## 03 Additional Resources - Translation on iPads

### Translate a webpage...

When you see an entire webpage you want to have translated for you, Microsoft Translator is able to change the entire webpage into a different language.

First open the app on the iPad and tap the settings icon in the bottom right hand corner. This will show you all the settings that can be adjusted, but we want to focus on a single one: Safari Translation Language.

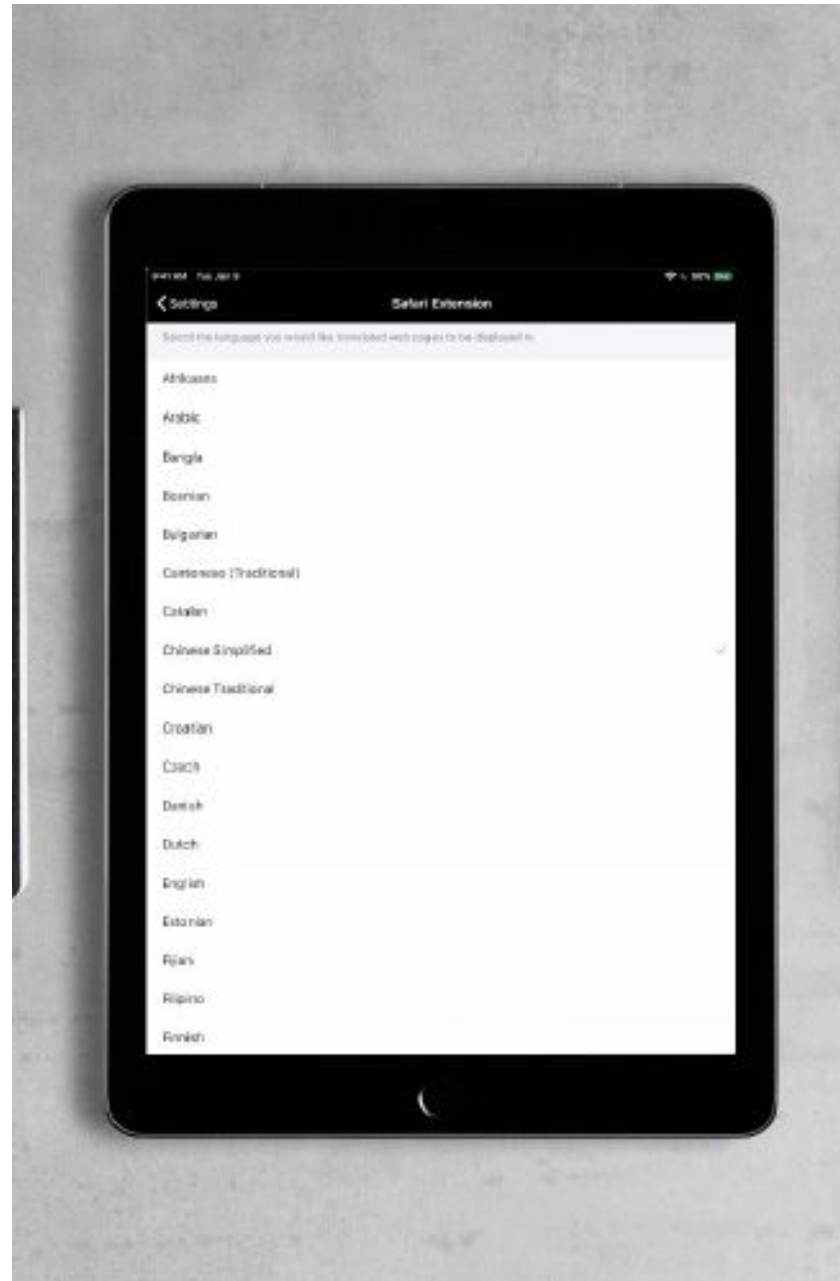

To view this video online, [click here](#).

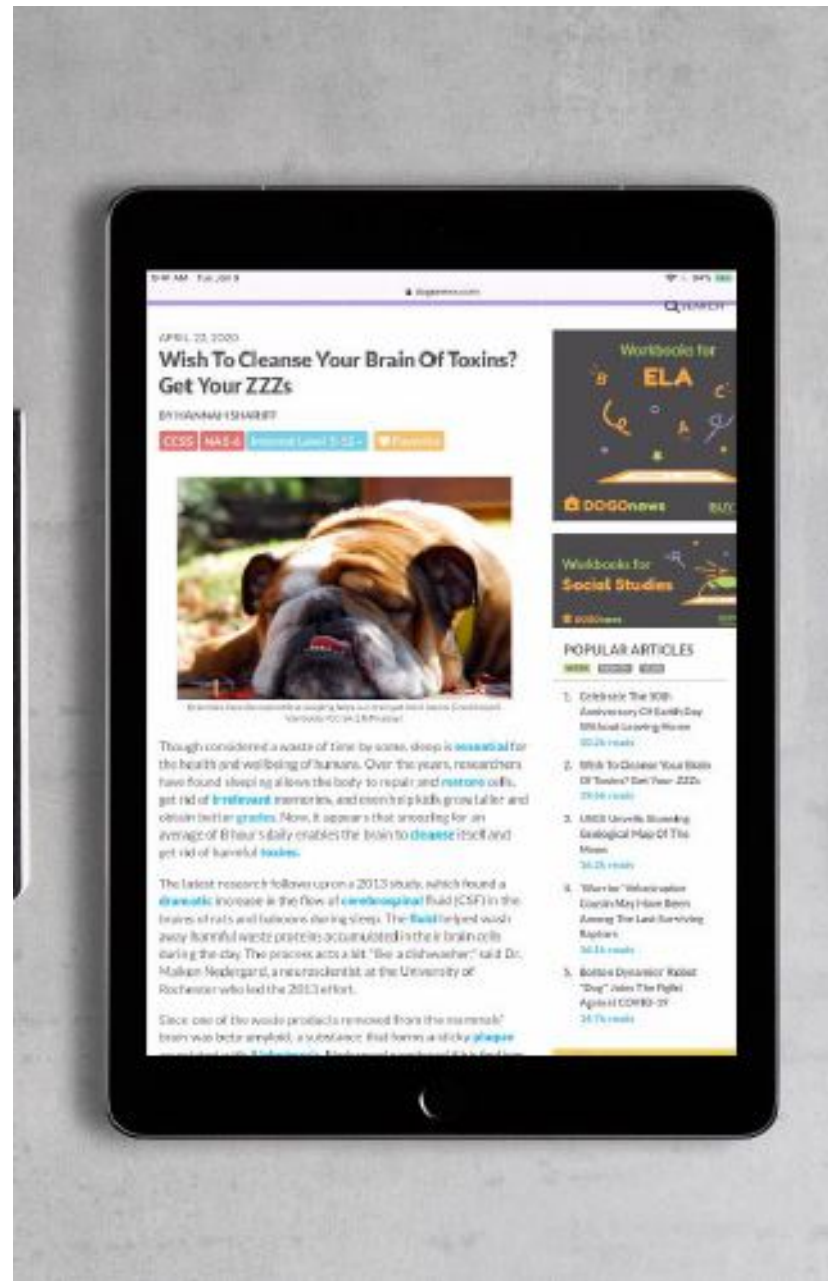

## 03 Additional Resources - Translation on iPads

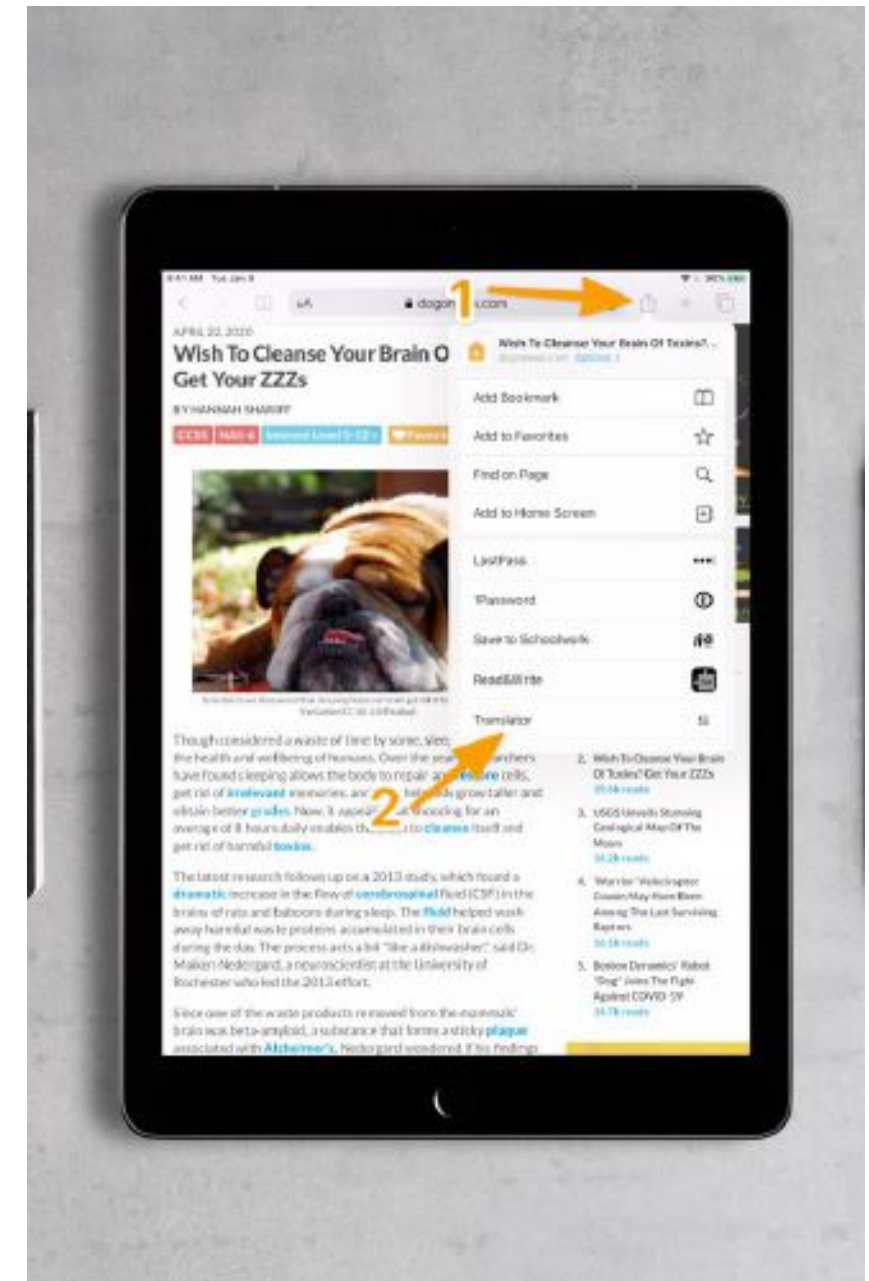

### Using extended options

Choose the language you would want a webpage translated into. A green checkmark will appear next to the language you chose. If you choose nothing, it will default to English.

Open a webpage you want to have translated.

First tap the share button at the top right, and then choose Translator from the menu. You will have to scroll down a bit to find it.

## 03 Additional Resources - Translation on iPads

A yellow bar will appear at the top to show you how the translation is coming along.

Once it's done, that yellow bar will show you what language is shown on the page.

Finally, if you ever want to return to default language, you can always just reload the page by tapping the  button near the top right of the screen.

### 想清洗你大脑的毒素吗？获取您的 ZZZ

由汉娜·谢里夫

CCSS NAS-6 利息级别 5-12- 喜欢

科学家发现睡眠有助于我们的大脑摆脱毒素 (信用: 乔纳森·范盖尔德/CC-SA-2.0/Pixabay)

虽然有些人认为是浪费时间，但睡眠是基本为了人类的健康和福祉。多年来，研究人员发现睡眠可以修复身体和恢复细胞，摆脱无关记忆，甚至帮助孩子长高，并获得更好的成绩。现在，似乎每天平均打盹8小时，使大脑净化自己，摆脱有害的毒素。

最新的研究对2013年的一项研究进行了跟踪，该研究发现戏剧性流量增加脑脊液睡眠期间大鼠和大猩猩大脑中的液体（CSF）。的流体帮助洗掉白天在脑细胞中积累的有害废物蛋白。罗切斯特大学的神经学家迈肯·内德加德博士说，这个过程有点像洗碗机。

由于从哺乳动物大脑中去除的废物之一是β-淀粉样蛋白，一种形成粘性的物质斑块与阿尔茨海默氏症，内德加德想知道，如果他的发现可以提供一个新的理解进步紊乱，导致人类脑细胞退化和死亡。虽然这个想法肯定是合理，需要进一步的研究，以验证。
