Connecting to YCS via Cisco VPN

Go to https://vpn.ycschools.us

At the web page choose advanced

Then choose proceed to vpn.ycschools.us

You should see this screen

C Magestranijoshootus: x	
🔄 🗇 🛈 🛦 Net secure jargEl/spr.yes/holisas/~CSCOE-Jogan/Med	÷ • 0 • 1
🗮 Apps 📷 Sciptüstlinache C: 🚔 Configuring a Roch I 🌞 Nagios 🚺 System Adminis Wei: 👩 Basic vi Commanda 💩 Login to Webm	n 🙃 Google Apps 🔄 Sentinel Technologie 🧔 Theolet - Knowledge 🛄 How To Male An Ur. 🔹 📘 Other bookmarks

Type in the provided user name and password (vpnuser)

You should get to this screen,

Click on Download

It will try (and usually fail) to install the Cisco client, if so it will show you this screen

Click on the Windows 7/Vista/64/XP link, this will download the client for you.

💐 aryconnect-sim-1...eve \land

If your computer prompts you, just click yes, accept, agree, whatever and then double click on the downloaded file. (lower left in the below picture)

Show off X

Click on run

Next

All of the default setting should be fine so click through until it finishes.

The program will show up under programs on the start menu.

Clicking on it will open up this box

You can type in vpn.ycschool.us or this IP Address

You may get this warning

Connect anyway

S Cisco AnyConnect 204.38.174.3	
Group: Username: Password:	YCS_NewWorld cstevenson7
	OK Cancel

Put the vpn user name in here and click ok.

Once connected you can use remote desktop or internal webpages to access resource on the YCS network.
